

# **Computing and Digital**

## **Computing, Digital and Media**

Campus: North Notts College

Code: NACCD001A

#### **About This Course**

The computing sector is rapidly evolving and becoming increasingly in demand. Companies are needing higher level digital skills to remain competitive. This is not only in areas of computing such as software development but also in data analysis and social media analytics.

Our courses are designed to give learners a broad set of digital skills to enter the workforce or study at a higher level. Specialities include software engineering, security, data analysis, graphic design, game development, social media analytics, digital marketing and business.

These skills are becoming increasingly sought after and learners can start their journey at level 2 and progress to programmes on Level 3.

## What Will I Study?

The computing sector is rapidly evolving and becoming increasingly in demand. Companies are needing higher level digital skills to remain competitive. This is not only in areas of computing such as software development but also in data analysis and social media analytics.

Our courses are designed to give learners a broad set of digital skills to enter the workforce or study at a higher level. Specialities include software engineering, security, data analysis, graphic design, game development, social media analytics, digital marketing and business.

These skills are becoming increasingly sought after and learners can start	
their journey at level 2 and progress to programmes on Level 3.
